To Whom It May Concern:

Re: Recruitment

We recently worked with Arthur, Marshall Inc. in the effort to recruit an ob/gyn doctor to our practice. From start to finish everyone was quick to follow up and make sure we were given special attention. We are always cautious with candidates that may look at our practice in that we may not get that "perfect fit". But we were successful! The way in which the recruiter got to know our practice and truly learned what we were about, helped all of those involved in making the final choice and the "perfect fit" we have found with our new doctor.

They took a personal approach in working with our company by listening and keeping in tune with everything as it progressed. We couldn't have asked for better service, not to mention made a few new friends. I would recommend Arthur, Marshall to anyone who asks, "How did you find your new doctor?". Their dedication to this project and professional representation served us well.

We are looking forward to building a practice with our new doctor and also look forward to working with Arthur, Marshall should our future again require services such as these.

Thank you for the opportunity and success we have experienced.

Sincerely,

Brenda Proffitt
